LETTER OF TRANSMITTAL

February 10, 2009

Board of Administration
 San Diego City Employees' Retirement System
 401 West A Street, Suite 400
 San Diego, CA 92101

Dear Members of the Board:

At your request, we performed the June 30, 2008 actuarial valuation of the San Diego City Employees' Retirement System (SDCERS). The valuation results with respect to the San Diego Unified Port District (UPD) are contained in this valuation report. The table below presents the key results of the valuation for the UPD.

Table I-1 SDCERS - Unified Port District (all dollar amounts in millions)		
Valuation Date	6/30/2008	6/30/2007
Entry Age Normal UAL (millions)	\$ 21.5	\$ 16.0
Entry Age Normal Funding Ratio	92.0%	93.5%
UPD Contribution Rate	17.57%	19.09%
Fiscal Year	2010	2009
Annual Required Contribution (GASB):		
-if paid at the beginning of the year	\$ 7.2 million	\$ 7.3 million
-if paid throughout the year	\$ 7.5 million	\$ 7.6 million

- Unfunded Actuarial Liability (UAL):* The UPD's UAL has increased by \$5.5 million. The primary cause of this increase was the change in actuarial assumptions adopted by the Board earlier this year. These changes include a decrease in investment assumption from 8.00% to 7.75%, a decrease in the inflation rate assumption from 4.25% to 4.00%, and other changes to the assumptions regarding membership turnover, retirement, disability, mortality and salary increases.
- Funding Ratio:* This is the ratio of system actuarial assets to actuarial liabilities, which declined by 1.5%.
- Contributions (GASB ARC):* UPD contributions were determined under full compliance with the Governmental Accounting Standards Board (GASB) Statement Number 25, defining the annual required contribution (ARC) for the UPD for fiscal year July 1, 2009 through June 30, 2010 (FY 2010). The results of this valuation produced a decrease in the UPD's ARC of \$0.1 million. When measured as a percent of membership payroll, the ARC decreased by 1.52%.

More details on the plan experience for the past year, including the assumption changes and their impact on these June 30, 2008 valuation results, can be found in the valuation report.

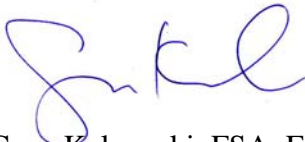

We certify that, to the best of our knowledge, this valuation report is complete and accurate and has been prepared in accordance with generally recognized and accepted actuarial principles and practices which are consistent with the Code of Professional Conduct and applicable actuarial standards set out by the Actuarial Standards Board and Actuarial Standards of Practice (ASOPs) Nos. 4, 27 and 35. As such, it reflects the actuary's responsibility under Section 5.8 of ASOP No. 4 "for assessing the implications of the overall results, in terms of short- and long-range benefit security and expected cost progression." In preparing our report, we relied without audit, on information supplied by SDCERS staff. This information includes, but is not limited to, plan provisions, employee data, and financial information.

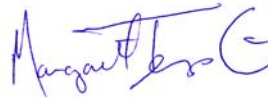

Finally, it's important to note that this valuation was prepared using census data and financial information as of the valuation date, June 30, 2008. Therefore, events following that date are not, and should not be, reflected in this report. The next valuation will reflect all membership and investment experience changes through June 30, 2009.

Sincerely,

Cheiron

Gene Kalwarski, FSA, EA, MAAA
Principal Consulting Actuary

Margaret Tempkin, FSA, EA, MAAA
Consulting Actuary

**SECTION I
BOARD SUMMARY**

The primary purpose of the actuarial valuation and this report is to report, as of the valuation date, on the following:

- The financial condition of the SDCERS-Unified Port District Defined Benefit Plan,
- Past and expected trends in the financial condition of SDCERS-Unified Port District,
- The UPD's contribution rates for Fiscal Year 2010, and
- Information required by the Governmental Accounting Standards Board (GASB).

In this Section, we present a summary of the principal valuation results. This includes the basis upon which the June 30, 2008 valuation was completed and an examination of the current financial condition of SDCERS-Unified Port District. In addition, we present a review of the key historical trends followed by the projected financial outlook for SDCERS-Unified Port District.

A. Valuation Basis

As stated in the Letter of Transmittal, the June 30, 2008 valuation results reflect a number of assumption changes that were approved by the SDCERS Board based on an experience study completed by Cheiron in July 2008. These changes include:

- Retirement rates were increased and the assumption was changed to be based on the amount of service as opposed to the age of a member,
- Termination rates were increased,
- Disability rates were decreased,
- The mortality rates for General and Safety Members were updated from UP1994 tables to RP2000 tables,
- The investment return assumption was lowered from 8.00% to 7.75%, and
- The inflation assumption was lowered from 4.25% to 4.00%.

In May 2007, the SDCERS Board approved several amortization periods that affect the calculation of the UPD's Unfunded Actuarial Liability (UAL). The amortization period for the UPD's then-existing June 30, 2007 UAL was set at 14 years, the amortization of future experience gains and losses was set at 15 years, and the amortization of changes in actuarial methods or assumptions was set at 30 years. The Board also approved an additional UAL cost component to ensure that there is no negative amortization of the UAL in any year. These amortization periods, which became effective with the UPD's June 30, 2007 actuarial valuation, were used to calculate the portion of the UPD's June 30, 2008 ARC that is attributable to the UAL.

The UPD's June 30, 2008 UAL of \$21.46 million is split into several tiers, each using a different amortization period. These tiers correspond to (1) the \$16.84 million remaining balance of the UPD's June 30, 2007 UAL now amortized over 13 years (\$1.56 million of the FY 2010 ARC); (2) the \$3.75 million UAL due to the impact of changes in actuarial assumptions that is

**SDCERS-UNIFIED PORT DISTRICT
JUNE 30, 2008 ACTUARIAL VALUATION**

**SECTION I
BOARD SUMMARY**

amortized over 30 years (\$0.21 million of the FY 2010 ARC); and (3) the \$0.87 million UAL due to the FY 2008 experience loss that is amortized over 15 years (\$0.08 million of the FY 2010 ARC). See “Beginning of Year ARC Component” in Table I-5 and Table IV-1 in Section IV.

B. Current Financial Condition of SDCERS-Unified Port District

The following discussion summarizes the key results of the June 30, 2008 valuation and how they compare to the results from the June 30, 2007 valuation.

1. UPD Membership

Table I-2 shows that total membership in SDCERS-Unified Port District increased by 3.4% from 2007 to 2008. Most of the increase was attributable to the growth in the inactive membership (terminated vested, disabled, retirees, and beneficiaries), as the active membership count increased only 1.1%. The average pay per active member increased by 2.9%, below the assumed payroll inflation of 4%.

Table I-2			
SDCERS - Unified Port District - Membership Total			
Item	June 30, 2008	June 30, 2007	% Change
Active Counts	565	559	1.1%
Terminated Vested	276	254	8.7%
Disabled	60	61	-1.6%
Retirees	246	233	5.6%
Beneficiaries	55	55	0.0%
Total UPD Members	1,202	1,162	3.4%
Active Member Payroll	\$ 38,634,835	\$ 37,159,870	4.0%
Average Pay per Active Member	68,380	66,476	2.9%

**SECTION I
BOARD SUMMARY**

2. UPD Assets and Liabilities

Table I-3 presents a comparison between the June 30, 2008 and June 30, 2007 SDCERS-Unified Port District assets, liabilities, UAL, and funding ratios.

The key results shown in Table I-3 indicate that even though the total actuarial liability increased 8.3% and the market value of assets decreased by 3.9%, the funding ratio decreased only 1.5% from June 30, 2007 to June 30, 2008. This is because SDCERS employs a commonly-used actuarial smoothing method on the market value that dampens market volatility. For the year ended June 30, 2008, the smoothed value of assets (called the actuarial value of assets) increased by 6.5%, which largely offset the increase in the actuarial liabilities. Section II-C provides additional information explaining the development of the actuarial value of assets.

Table I-3			
SDCERS - Unified Port District - Assets & Liabilities			
EAN funding method	June 30, 2008	June 30, 2007	% Change
Actives	\$ 130,541,076	\$ 121,588,551	7.4%
Terminated Vested	13,467,043	9,928,803	35.6%
Disabled	13,776,914	13,772,668	0.0%
Retirees	102,962,596	94,376,832	9.1%
Beneficiaries	<u>6,289,100</u>	<u>6,871,472</u>	<u>-8.5%</u>
Total Actuarial Liability	267,036,729	246,538,326	8.3%
Market Value Assets	\$ 233,027,785	\$ 242,403,219	-3.9%
Actuarial Value Assets	245,580,297	230,584,904	6.5%
Unfunded Actuarial Liability	\$ 21,456,432	\$ 15,953,422	34.5%
Funding Ratio-Actuarial Value	92.0%	93.5%	-1.5%

JUNE 30, 2008 ACTUARIAL VALUATION**

**SECTION I
BOARD SUMMARY**

3. Components of UAL Change between June 30, 2007 and June 30, 2008

SDCERS-Unified Port District unfunded actuarial liability (UAL) increased by \$5.5 million from \$16.0 million to \$21.5 million. The table below (shown in thousands for detail) presents the specific components of the change in the UAL.

The key findings in Table I-4 are that the assumption changes increased the UAL by \$3.7 million, and the investment losses increased the UAL by \$4.4 million. Partially offsetting those increases was a liability experience gain of \$2.4 million, and additional UPD and member contributions were more than expected by \$1.1 million.

Table I-4		
SDCERS - Unified Port District-Change in UAL		
(In Thousands)		
UAL change due to experience factors		
1.	Investment experience	\$ 4,428.9
2.	Purchased service credits paid for during the year*	-
3.	Liability experience	(2,429.4)
UAL change due to contribution factors		
4.	Contributions paid in excess of expected	(1,134.1)
UAL change due to actuarial assumption changes		
5.	Demographic Assumption Changes	(2,428.7)
6.	Economic Assumption Changes	6,178.4
Total		
7.	Total net overall change: (sum 1 through 6)	4,615.1
8.	Expected change in UAL	887.8
9.	Total actual change in UAL: 7 + 8	\$ 5,502.9

* *Attributable to members who have entered into a purchased service contract after June 30, 2007. (Gain) or Loss equals the difference between the actuarial liability before and after the additional service purchased. Most members were still purchasing credits under installment contracts primarily entered into before June 30, 2004.*

**SDCERS-UNIFIED PORT DISTRICT
JUNE 30, 2008 ACTUARIAL VALUATION**

**SECTION I
BOARD SUMMARY**

4. UPD Contributions

The Unified Port District's contribution for FY 2010 measured as a percent of payroll decreased by 1.52% of membership payroll, from 19.09% to 17.57%. In dollars, the required beginning of year contribution decreased slightly from \$7.3 million to \$7.2 million.

In Section IV of this report, we provide more detail on the development of this contribution rate.

Table I-5 SDCERS – Unified Port District – Contributions			
EAN funding method	June 30, 2008	June 30, 2007	% Change
Gross Normal Cost %	23.58%	25.99%	-2.4%
Member Cost %	<u>10.53%</u>	<u>10.71%</u>	<u>-0.2%</u>
Employer Normal Cost %	13.05%	15.28%	-2.2%
Employer Unfunded Liability Cost %	4.52%	3.81%	0.7%
Negative Amortization Adjustment Cost %	<u>0.00%</u>	<u>0.00%</u>	<u>0.0%</u>
Total Employer Cost %	17.57%	19.09%	-1.5%
Annual Required Contribution (GASB):			
-if paid at the beginning of the year	\$ 7.2 million	\$ 7.3 million	-1.2%
-if paid throughout the year	\$ 7.5 million	\$ 7.6 million	-1.4%
The total \$7.2 million ARC is made up of the following components (shown in thousands for detail):			
<u>in thousands</u>	Beginning of Year ARC Component		
\$ 5,350.2	Employer Normal Cost		
\$ 1,560.7	13-year amortization of the outstanding 2007 UAL balance 06/30/2008		
\$ 78.7	15-year amortization of the UAL due to the experience loss in FY2008		
\$ 214.9	30-year amortization of the UAL increase due to assumptions changes		
<u>\$ 0</u>	Amount needed to avoid negative UAL for FY 2010		
\$ 7,204.5	Total FY 2010 beginning of year ARC		

Note: The differing amortization periods above for the respective tiers of the UAL were approved by the SDCERS Board effective with the June 30, 2007 valuation.

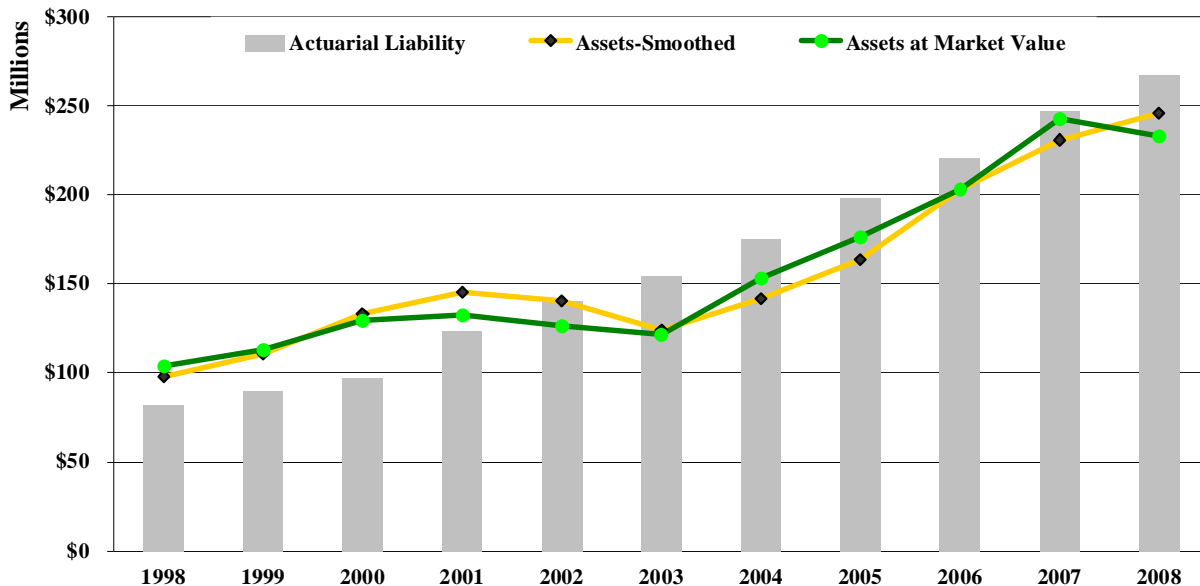

SECTION I
 BOARD SUMMARY

C. Historical Trends SDCERS-Unified Port District

Despite the fact that most of the attention given to the valuation focuses on the most recently computed unfunded actuarial liability (UAL), funding ratio, and the UPD’s contribution rate, it is important to remember that each valuation is merely a snapshot of the long-term progress of a pension fund. It is more important to judge a current year’s valuation result relative to historical trends, and trends expected into the future.

In the chart below, we present the historical trends for the market value and smoothed assets compared to actuarial liabilities and also show the SDCERS-Unified Port District funding ratios since 1998.

SDCERS- Unified Port District Assets and Liabilities 1998-2008

Funded

Ratio	120.1%	122.8%	137.1%	118.0%	100.3%	80.3%	80.6%	82.6%	92.1%	93.5%	92.0%
UAL (millions)	\$ (16.4)	\$ (20.5)	\$ (36.0)	\$ (22.2)	\$ (0.4)	\$ 30.4	\$ 34.0	\$ 34.4	\$ 17.4	\$ 16.0	\$ 21.5

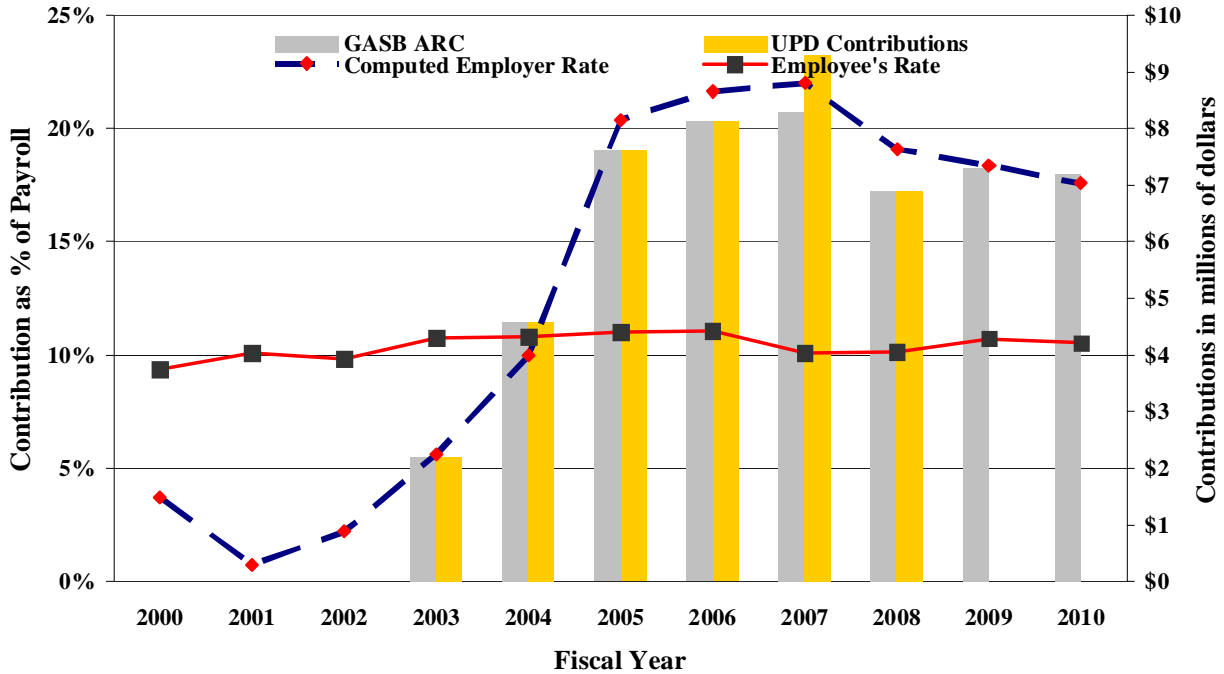

* The UAL for 2007 and after is calculated using the Entry Age Normal method; 2006 and prior years are calculated using the Projected Unit Credit method.

The chart indicates that from 1998 to 2002, SDCERS-Unified Port District maintained full funding. However, in 2003 the funding ratio declined significantly. From 2004 to 2007, the ratio improved significantly, primarily due to strong investment performance. In 2008, the funding ratio declined slightly primarily due to a change in actuarial assumptions.

**SECTION I
 BOARD SUMMARY**

In the chart below, we present the historical trends for the SDCERS-Unified Port District contribution rates since FY 2000, as well as actual contributions made by the UPD and the actuarially computed GASB ARC since FY 2003.

SDCERS-Unified Port District and Member Contribution Rates FY 2000-2010

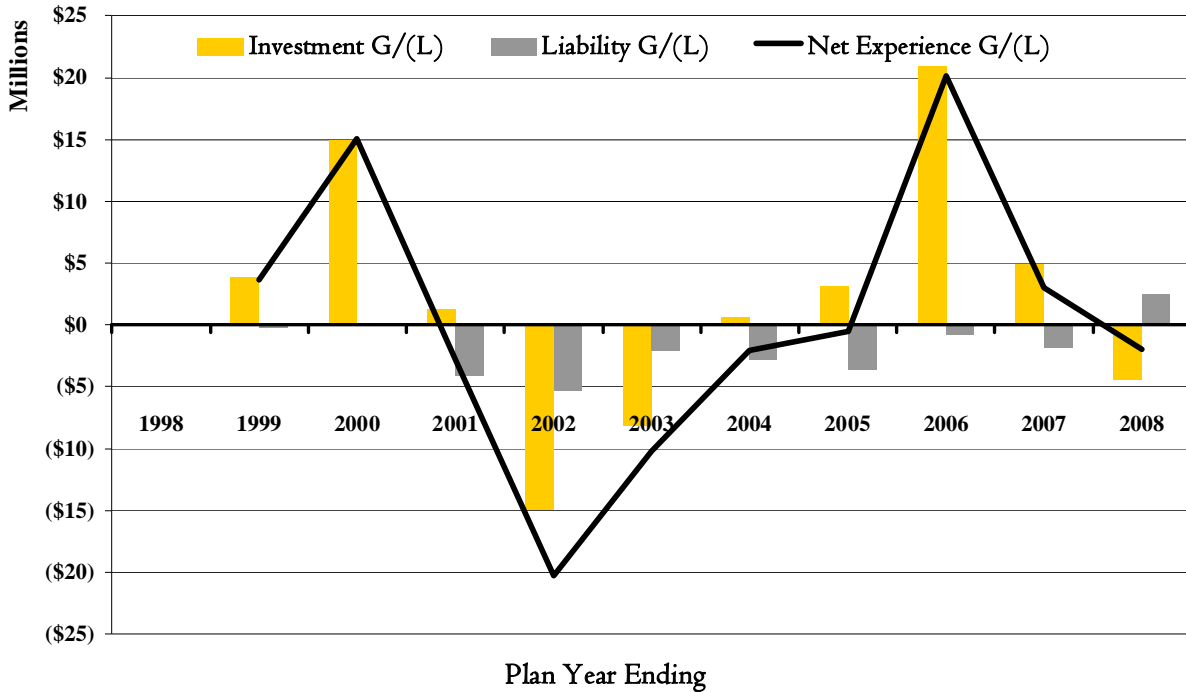

The key information in this chart is the escalation in the computed employer contribution rate between fiscal years 2001 and 2007. Since then, the UPD's contribution rate has stabilized with slight declines in fiscal years 2008 to 2010. The chart also indicates that the members' contribution rate has remained relatively stable throughout the fiscal years shown.

This chart also compares the actual contributions made by the Unified Port District beginning in FY 2003, to the actuarially required contribution (ARC) based on the Board's adopted funding practice of Normal Cost plus various amortization of UALs, including the requirement beginning in fiscal year 2009 that there be no negative amortization. The chart indicates that the Unified Port District has been consistently paying at or above the ARC since FY 2003.

**SECTION I
 BOARD SUMMARY**

The last historical chart for SDCERS-Unified Port District presents the pattern of annual gains and losses, broken into the investment and liability components. The chart does not include any changes in SDCERS' assets and liabilities attributable to changes to methods, procedures or assumptions. The experience prior to 1999 is not available for SDCERS-Unified Port District.

SDCERS-Unified Port District Historical Gain/(Loss) 1998-2008

The key insights from this chart are:

- Investment gains (gold bars) from 1998 through 2000 were significantly offset by investment losses from 2001 through 2003. From 2004 to 2007, there were positive investment trends. In 2008, the investment trend turned negative.
- There had been a pattern of losses from 2001 to 2007. With the change in actuarial assumptions in 2008 to better reflect the UPD's demographic experience, the liability experience produced a small gain.

SDCERS-UNIFIED PORT DISTRICT
JUNE 30, 2008 ACTUARIAL VALUATION

**SECTION I
BOARD SUMMARY**

D. Projected Financial Trends SDCERS-Unified Port District

Our analysis of SDCERS-Unified Port District projected financial trends is an important part of this valuation. Our assessment of the implications of the June 30, 2008 valuation results on the future outlook of SDCERS-Unified Port District in terms of benefit security (assets over liabilities) and the UPD’s expected cost progression is set forth below. In addition, given the concern regarding unfunded liabilities, we also show the UPD’s expected future pay down of unfunded liabilities.

In the charts that follow, we project the SDCERS-Unified Port District plan assets and liabilities, the pay down of UAL, and the Unified Port District’s contributions as a percent of payroll on two different bases:

- 1) Assuming 7.75% returns each and every year, and
- 2) Assuming returns shown in the table below which begin with rates of return that start at negative 15% but then vary each year thereafter over the projection period, but over the entire period averages out to the assumed 7.75%. We do this in reflection of the first half of current fiscal year return which has been significantly negative, but followed by positive returns to reflect what has happened historically whenever there have been serious market downturns.

	<u>2008</u>	<u>2009</u>	<u>2010</u>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017</u>
Return	-15.00%	5.76%	9.65%	7.36%	8.45%	3.77%	16.66%	13.70%	18.76%	-4.18%
	<u>2018</u>	<u>2019</u>	<u>2020</u>	<u>2021</u>	<u>2022</u>	<u>2023</u>	<u>2024</u>	<u>2025</u>	<u>2026</u>	<u>2027</u>

SECTION I
 BOARD SUMMARY

Projection Set 1
 Assets and Liabilities – Unified Port District

The two charts below show asset measures (green and gold lines) compared to liabilities (grey bars). At the top of each chart is the progression of the SDCERS-Unified Port District funding ratios. The most revealing insight from these two charts is how varying investment returns impact the System’s funding ratios from year to year.

Chart 1: Projection of Assets and Liabilities, 7.75% return each year

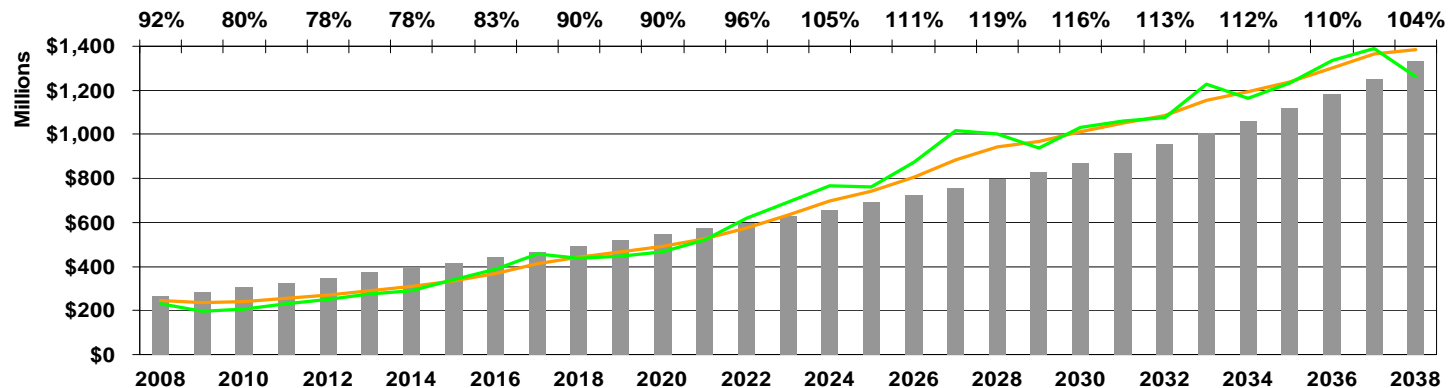

Chart 2: Projection of Assets and Liabilities, varying returns averaging 7.75%

Actuarial Liability Actuarial Value of Assets Market Value of Assets

SECTION I
BOARD SUMMARY

Projection Set 2
Pay down of the Unfunded Actuarial Liability (UAL) Unified Port District

Choice of an amortization period is significant when viewing the projected pay down of the UAL, especially when one is assuming level returns. The chart to the right below demonstrates that varying returns (which always happen) will have a dramatic impact on the annually computed UAL.

Chart 1: 7.75% return each year

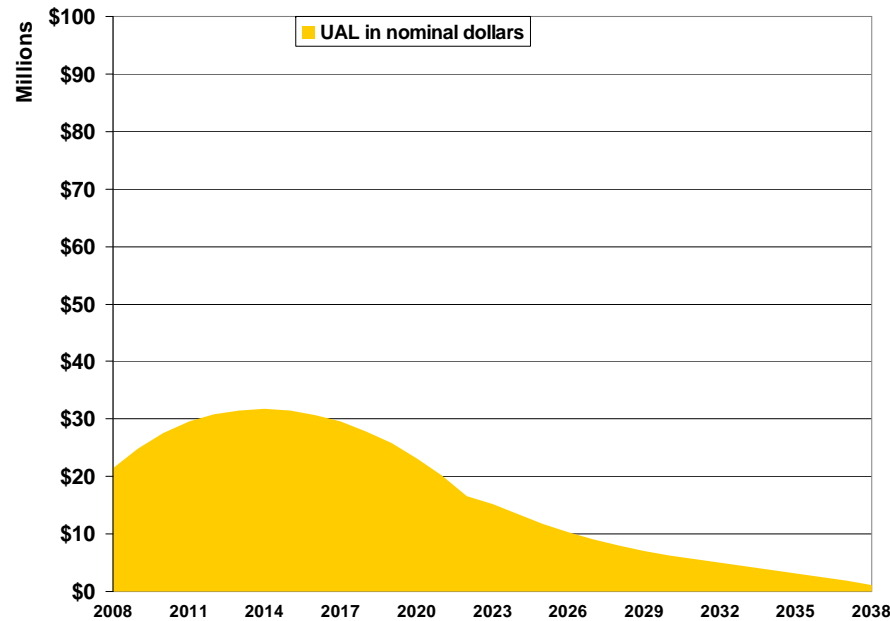

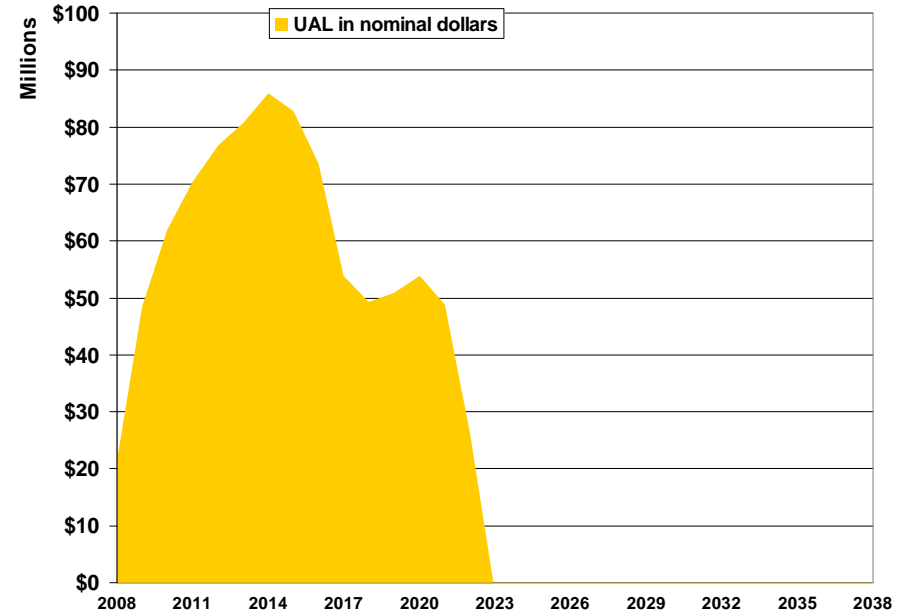

Chart 2: Varying returns averaging 7.75%

SECTION I
 BOARD SUMMARY

Projection Set 3
 Contribution Rate – Unified Port District

As seen on the chart to the right below, varying returns will also have a significant impact on the actuarially computed UPD contribution rate.

Chart 1: 7.75% return each year

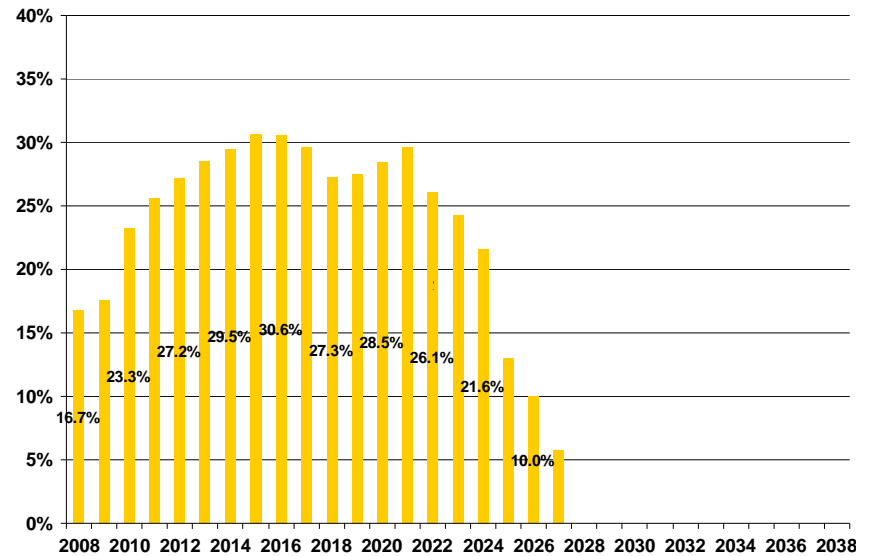

Chart 2: Varying returns averaging 7.75%

SECTION II ASSETS

Like other public pension plans, SDCERS uses two different asset measurements that are presented in this section of the report: market value and actuarial value of assets. The market value represents, as of the valuation date, the value of the assets if they were liquidated on that date. The actuarial value of assets is a value that attempts to smooth annual investment return performance over multiple years to reduce annual investment volatility. The actuarial value of assets is used in determining SDCERS' contribution rates for the three participating employer plans.

Each employer receives a separate actuarial valuation report and cost determination. However, the assets of all employer plans are pooled for investment purposes. The apportionment of the assets among the employer plans directly impacts each employer's costs. Therefore, in the interest of ensuring transparency, we disclose in this section information on the total assets of SDCERS-All Employers. How those assets are apportioned to the City of San Diego, the Unified Port District (Port), and the San Diego County Regional Airport Authority (Airport) is explained here.

On the following pages we present detailed information on SDCERS-All Employers assets:

- A. Disclosure of the June 30, 2008 total SDCERS market value of assets, by asset class
- B. Market value of assets by Plan sponsor
- C. Development of the actuarial value of assets
- D. Disclosure of the investment performance for the year

**SECTION II
ASSETS**

A. Disclosure

The market value of assets represents a “snap-shot” value as of June 30, the last day of the fiscal year, that provides the principal basis for measuring financial performance from one year to the next. Market values, however, can fluctuate widely with swings in the investment markets. Because these fluctuations would cause volatility in employer contributions, an actuarial value of assets is developed. Table II-1 below discloses the market value by asset class of SDCERS – All Employers’ gross assets on June 30, 2008.

Cash	\$ 506,522,453
US Stocks	1,780,841,026

Fixed Assets	522,829
Miscellaneous	15,664
Accounts Payable	<u>(257,047,691)</u>
Market Value of Assets – June 30, 2008	\$ 4,696,603,459

SDCERS- UNIFIED PORT DISTRICT
JUNE 30, 2008 ACTUARIAL VALUATION

**SECTION II
ASSETS**

B. Market Value of Assets by Plan Sponsor

As of July 1, 2007, the City, UPD and Airport Authority plans have been separated into independent, qualified, single employer governmental defined benefit plans and trusts. The assets of the three separate plans and trusts are pooled in the SDCERS Group Trust, which was established as of July 1, 2007. SDCERS invests and administers the Group Trust as a common investment fund and accounts separately for the proportional interest of each plan and trust that participates in the Group Trust. Cash flow activity for each plan is recorded directly to that plan, with investment activity and other cash flow activity not specific to any one plan being allocated based upon each plan's respective share of the Group Trust's total assets, with time-weighted adjustments for the plan-specific cash flows.

**Table II-2

**SDCERS-UNIFIED PORT DISTRICT
JUNE 30, 2008 ACTUARIAL VALUATION**

**SECTION II
ASSETS**

C. Actuarial Value of Assets

To determine on-going funding requirements, most pension funds utilize an actuarial value of assets. Unlike the market value of assets, the actuarial value of assets represents an asset value based on averaging or smoothing year-to-year market value returns for purposes of reducing the resulting volatility on contributions.

The actuarial value is calculated by accepting 100% of the expected asset value as of June 30, 2008 (assuming 8% earnings for the year) plus 25% of the difference between the actual market value next year and expected asset value. (See Appendix B, section B-2 for further explanation of the asset valuation method). In no event will the actuarial value of assets ever be less than 80% of the market value of assets, nor ever greater than 120% of the market value of assets.

Table II-3 SDCERS – Unified Port District Development of Actuarial Value of Assets at June 30, 2008 Expected Value of Assets Method		
1.	Actuarial Value of Assets at June 30, 2007	\$ 230,584,904

ASSETS

D. Investment Performance

The return on the market value of assets, as reported by SDCERS' investment advisor Callan Associates, was a negative 4.66%. The return in FY 2007 was 16.50%.

On an actuarial (smoothed) value of assets basis, the return for FY 2008 was 6.24%. This return produced for SDCERS-All Employers, an overall investment loss of \$87.1 million for the year ending June 30, 2008. (Note this reported loss is different than the investment loss of \$4.4 million reported on page 4 in this report. The latter is the loss only for the SDCERS-Unified Port District.)

SECTION III LIABILITIES

In this Section, we present detailed information on liabilities for SDCERS-Unified Port District including:

- Disclosure of liabilities at June 30, 2007 and June 30, 2008, and
- Statement of changes in the unfunded actuarial liabilities during the year.

A. Disclosure

Several types of liabilities are calculated and presented in this report. Each type is distinguished by the purpose for which the figures are ultimately used.

- **Present Value of all Future Benefits:** Used for measuring all future SDCERS obligations, represents the amount of money needed today to fully pay off all benefits of SDCERS both earned as of the valuation date and those to be earned in the future by current plan participants, under the current Plan provisions.
- **Actuarial Liability-Entry Age Normal (EAN):** Used for determining employer contributions and GASB accounting disclosures. This liability is calculated taking the present value of all future benefits and subtracting the present value of future member contributions and future employer normal costs as determined under the EAN actuarial funding method.
- **Present Value of Accrued Benefits:** Disclosed in Section V of this report for accounting statement purposes (FASB 35). This liability represents the present value of future benefits payable to all plan participants if the plan were terminated as of the valuation date, and future accruals and contributions stopped.

Table III-1 on the following page discloses the first three of these liabilities for the current and prior year valuations. Subtracting the actuarial value of assets from the actuarial liability results in a net surplus or an unfunded actuarial liability (UAL).

LIABILITIES**

B. Changes in Unfunded Actuarial Liabilities

The UAL of any retirement plan is expected to change at each subsequent valuation for a variety of reasons. In each valuation, we report on those elements of change in the UAL that have particular significance or could potentially affect the long-term financial outlook of a retirement plan. Below we present key changes in liabilities since the last valuation.

Table III-3	
Development of 2008 Experience Gain/(Loss) SDCERS - Unified Port District

* Airport Authority split as of December 31, 2002.

SECTION IV CONTRIBUTIONS

In the process of evaluating the financial condition of any pension plan, the actuary analyzes the assets and liabilities to determine what level (if any) of contributions is needed to achieve and maintain an appropriate funded status of a plan. Typically, the actuarial process will use an actuarial funding method that will result in a pattern of contributions that are both stable and predictable.

The actuarial funding methodology employed is the Entry Age Normal (EAN) actuarial funding method. Under EAN, there are two components to the total contribution: the normal cost, and the unfunded actuarial liability contribution. The normal cost rate is determined by taking the value, as of entry age into the plan, of each member's projected future benefits. This value is then divided by the value, also at entry age, of each member's expected future salary. The normal cost rate is multiplied by current salary to determine each member's normal cost. Finally, the normal cost is reduced by the member contribution to produce the employer normal cost. The difference between the EAN actuarial liability and the actuarial value of assets is the unfunded actuarial liability. The UAL for FY 2010 is to be amortized over several different periods. The amortization of the UAL due to assumption changes was over 30 years, the fiscal year ending June 30, 2008 experience loss was amortized over 15 years, and the outstanding balance of the June 30, 2007 UAL was amortized over 13 years. Finally, there is an additional UAL cost component to ensure that there is no negative amortization in any year.

Table IV-1 on the following page shows how the Unified Port District's contribution rate for SDCERS for FY 2010 is developed. The methodology and assumptions used are in full compliance with the parameters set in GASB Statement No. 25 for purposes of determining the annual required contribution (ARC).

2. Factors based on UAL payments commencing at the end of year FY 2010

SECTION V
ACCOUNTING STATEMENT INFORMATION

Statement No. 35 of the Financial Accounting Standards Board (FASB) requires the disclosure of certain information regarding funding status. Statement No. 25 of the Governmental Accounting Standards Board (GASB) establishes standards for disclosure of pension information by public employee retirement systems and governmental employers in notes to financial statements and supplementary information.

The FASB No. 35 disclosure provides a “snap shot” view of how System assets at market value compare to liabilities if contributions stopped and accrued benefit claims had to be satisfied.

The GASB No. 25 disclosure presents the actuarial liability computed for funding purposes to the actuarial value of assets to determine a funded ratio (i.e., the EAN liability).

Both the present value of accrued benefits (FASB No. 35) and the actuarial liability (GASB No. 25) are determined assuming that participants continue to terminate employment, retire, etc., in accordance with the actuarial assumptions. Liabilities are discounted at the assumed valuation interest rate of 7.75% per annum.

FASB Statement No. 35 specifies that a comparison of the present value of accrued (accumulated) benefits to the market value of the assets as of the valuation date must be provided. GASB Statement No. 25 requires the actuarial liability be compared with the actuarial value of assets for funding purposes. The relevant amounts as of June 30, 2007 and June 30, 2008 are presented in Table V-1 and Table V-2.

SECTION V
ACCOUNTING STATEMENT INFORMATION

Tables V-3 through V-5 are exhibits required for the UPD’s Comprehensive Annual Financial Report (CAFR). The Government Finance Officers Association (GFOA) recommends showing at least 6 years of experience in each of these exhibits. Table V-3 shows the Notes to Required Supplementary Information. Table V-4 presents an analysis of financial experience for the valuation year, and Table V-5 presents the Solvency Test which shows the portion of actuarial liability covered by assets.

Table V-3
SDCERS - Unified Port District
NOTES TO REQUIRED SUPPLEMENTARY INFORMATION

The information presented in the required supplementary schedules to the Financial Section of the CAFR was determined as part of the actuarial valuation at the date indicated. Additional information as of the latest actuarial valuation follows.

Valuation date	June 30, 2008
Actuarial funding method	Entry Age Normal
Amortization method	Level percent closed
Remaining amortization period	13 years ¹
Asset valuation method	Expected Value Method
Actuarial assumptions:	
Investment rate of return	7.75%
Projected salary increases due to inflation ²	4.00%
Cost-of-living adjustments	2.0%

The actuarial assumptions used have been recommended by the actuary and adopted by SDCERS’ Board of Administration based on the most recent review of SDCERS’ experience, completed in 2008.

The rate of employer contributions to SDCERS is composed of the normal cost and an amortization of the unfunded actuarial liability. The normal cost is a level percent of payroll cost which, along with the member contributions, will pay for projected benefits at retirement for the average plan participant. The actuarial liability is that portion of the present value of projected benefits that will not be paid by future employer normal costs or member contributions. The difference between this liability and the funds accumulated as of the same date is the unfunded actuarial liability.

- 1 13 years for the outstanding balance of the 2007 UAL, 15 years for experience gains and losses, 30 years for changes in methods and assumptions, 5 years for benefit changes.
- 2 Additional merit salary increases of 0.50% to 5.00% based on a participant’s years of service, and membership group are also assumed. These increases are not used in the amortization of SDCERS’ UAL.

APPENDIX A
MEMBERSHIP INFORMATION

Data Assumptions and Practices

In preparing our data, we relied without audit on information supplied by the SDCERS' staff. This information includes, but is not limited to, plan provisions, employee data, and financial information. Our methodology for obtaining the data used for the valuation is based upon the following assumptions and practices:

- Service for Actives and Inactives was calculated using Benefit Service. An adjusted date of hire is retroactively calculated from the valuation date. Purchased Service that has been paid for is included in the Benefit Service field. Purchased Service that has been applied for, but not paid as of the valuation date will be assumed to be paid in full and this service will be reflected in the projected benefit.
- Valuation Salary will be the maximum of "Current Annual Pensionable Salary" and annualized "Average Compensation."
- For accounts having duplicate records in the Actives and Inactives by Social Security Number the information from the latest payroll date is regarded as most up to date. The other record is treated as out of date and invalid.
- There is one duplicate record (based on SSN and Benefit Type) in the payee file. The two records are from the same plan and same benefit type, but different benefit amounts. We have added those amounts together.
- Records on the provided "Member" file are considered to be Active if they have no "Date of Death", no "Date of Separation", do not have a retiree record and they received pay in the last pay period (Last Pay Period = 26) of the current FY.
- Records on the "Member" file are considered to be Inactive if they do not have a "Date of Death", do not have a retiree record and either have a "Date of Separation" or have a "Last Pay Period" earlier than the last pay period of the current FY.
- Records on the "Payee" file are considered in pay status if their benefit is not suspended.
- Pension Benefit for retirees for each plan was calculated by summing "Monthly Pension", "Monthly Annuity", "Cola Annuity", "Surviving Spouse Annuity", and "Cola Pension" and subtracting "Non-Cola Adjustments". "Non-Cola Adjustments" field is mainly for Qualified Domestic Relation Order purposes. The "Supplement Amt" field is added as an annual benefit (i.e. 13th check) and the "Corbett Supplemental Payment" is annualized for new members in the City only. It is assumed the payment is annual for members already in pay status prior to this valuation.
- Members retiring since 11/1/2006 and not having a "Supplement Amt" (13th check) will have their projected "Supplement Amt" (13th check) calculated assuming \$30 multiplied by the "Total Service Credit."

APPENDIX A
MEMBERSHIP INFORMATION

- Members may retire and receive benefits from multiple Plan IDs (e.g. - a City police officer could have also worked for the Airport Authority); we will value each members' blended benefit individually. This will result in the counts being slightly higher than actual counts due to people having more than one benefit payable from multiple plans.
- We assume any member found in last year's "Payee" file and not in this year's file has died without a beneficiary and should be removed from the valuation data.
- We assume all deceased members with payments continuing to a beneficiary have already been accounted for in the "Payee" file.
- We exclude any payee receiving \$0.00 from a blended benefit plan.
- We assume that any active member found in the inactive data last year has returned to work and should be valued as active.
- The VCP filing procedure was used to calculate the present value of members' benefits over their Internal Revenue Service Code Section 415 Benefit Limits.

**APPENDIX B
ACTUARIAL ASSUMPTIONS AND METHODS**

A. Actuarial Assumptions

1. Investment Return Rate

SDCERS' assets are assumed to earn 7.75% net of expenses

2. Inflation Rate

An inflation assumption of 4.00% compounded annually is used for projecting the total annual payroll growth for amortization of the UAL. It also represents the difference between the investment return rate and the assumed real rate of return.

3. Interest Credited to Member Contributions

7.75%, compounded annually.

4. Salary Increase Rate

Inflation component: 4.00%

The additional merit component:

Years of Service at Valuation Date	General	Safety
0	5.00%	8.00%
1	4.00%	7.00%
2	3.00%	6.00%
3	2.00%	3.50%
4	1.00%	2.00%
5+	0.50%	0.50%

5. Cost-of-Living Increase in Benefits

Assumed to be 2.0% per annum, compounded.

6. COLA Annuity Benefit

For active members, there is a 2.5% load on valued benefits to anticipate the impact of the annuitized employee COLA contributions at retirement.

APPENDIX B
ACTUARIAL ASSUMPTIONS AND METHODS

7. Member Refunds

Part of the employee contribution rate is subject to potential “pick up” by the employer. That “pick up” and the related accumulated interest are not to be refunded to employees at termination. The liability for potential refunds is reduced to reflect this.

8. Rates of Termination

Age	General	Safety
20	12.78%	5.00%
25	8.33	4.07
30	5.83	3.57
35	4.60	3.07
40	3.36	2.67
45	2.78	2.33
50	2.78	2.33
55	2.78	2.33
60	2.78	2.33

*Add 1% to every age for each year of service less than 5 years

20% of terminating employees, with 5+ years of service at termination, are assumed to subsequently work for a reciprocal employer and receive 4.50% pay increases per year.

APPENDIX B
ACTUARIAL ASSUMPTIONS AND METHODS

9. Rates of Disability

Age	General	Safety
20	0.04%	0.40%
25	0.06	0.40
30	0.07	0.40
35	0.11	0.50
40	0.15	0.63
45	0.23	0.82
50	0.35	0.95
55	0.53	1.80
60	0.68	--

60% of the general disabilities and 80% of the safety disabilities are assumed to be industrial disability retirements. Non-industrial disability retirement is subject to service requirement.

10. Rates of Mortality for Active Lives

General members follow the RP2000 Combined Healthy table (male and female) projected to 2008. Safety members follow the Male RP2000 projected to 2008, set forward two years.

Age	General		Safety
	Male	Female	
20	0.03%	0.02%	0.03%
25	0.03	0.02	0.04
30	0.04	0.02	0.05
35	0.07	0.04	0.09
40	0.10	0.06	0.11
45	0.14	0.10	0.15
50	0.18	0.15	0.23
55	0.31	0.25	0.41
60	0.59	0.49	0.78
65	1.14	0.93	1.45
70	1.97	1.61	2.42

All active member deaths are assumed to be duty-related for safety members and not duty-related for other members.

**APPENDIX B
 ACTUARIAL ASSUMPTIONS AND METHODS**

11. Rates of Mortality for Retired Healthy Lives

All retired healthy members use the RP2000 Combined Healthy table (male and female). Safety members use the RP2000 Combined Healthy table set forward two years (male and female).

Age	General		Safety	
	Male	Female	Male	Female
40	0.11%	0.07%	0.12%	0.09%
45	0.15	0.11	0.17	0.13
50	0.21	0.17	0.27	0.20
55	0.36	0.27	0.47	0.35
60	0.67	0.51	0.88	0.67
65	1.27	0.97	1.61	1.22
70	2.22	1.67	2.73	2.07
75	3.78	2.81	4.69	3.41
80	6.44	4.59	8.05	5.63
85	11.08	7.74	13.60	9.63
90	18.34	13.17	21.66	15.76

12. Rates of Mortality for Retired Disabled Lives

Disabled General members use Uninsured Pensioner 1994 (UP1994) male only table set forward five years. Disabled Safety members use Uninsured Pensioner 1994 (UP1994) male only table set forward two years.

Age	General	Safety
20	0.07%	0.06%
25	0.09	0.08
30	0.09	0.09
35	0.12	0.10
40	0.17	0.13
45	0.28	0.20
50	0.48	0.35
55	0.86	0.60
60	1.56	1.09
65	2.55	1.94
70	4.00	3.06

APPENDIX B
ACTUARIAL ASSUMPTIONS AND METHODS

13. The Rates of Retirement

Service	General	Safety
5-9	9%	9%
10-19	33	32
20	41	32
21	33	14
22	35	18
23	37	23
24	39	27
25	41	32
26	42	36
27	44	41
28	46	45
29	48	50
30	50	100
31	51	100
32	53	100
33	55	100
34	57	100
35+	100	100

For vested deferred members, we assume that retirement will occur provided they have at least 5 years of service (excluding the 5 year permissible purchased service) on the later of attained age or:

General Members: Earlier of age 62 or age 55 and 20+ years of service

Safety Members: Earlier of age 55 or age 50 and 20+ years of service

If the inactive member is not vested, the liability is the member's contributions with interest.

**APPENDIX B
ACTUARIAL ASSUMPTIONS AND METHODS**

14. Family Composite Assumptions

80% of men and 50% of women were assumed married at retirement. A female spouse is assumed to be 4 years younger than her male spouse.

15. Member Contributions for Spousal Continuance

All active members contribute towards a 50% survivor continuance. However, members who are unmarried at retirement may either be refunded that specific part of their contributions, or they may leave such contributions on account and receive an incremental benefit that is the actuarial equivalent of such contributions.

16. Deferred Member Actuarial Accrued Benefit

The benefit was estimated based on information provided by SDCERS staff. The data used to value the estimated deferred benefit were date of birth, date of hire, date of termination, and last pay. Based on the data provided, service credit, highest average salary, and deferred retirement age were estimated. The estimates were used to compute the retirement benefit, upon which the liabilities are based. For those members without sufficient data or service, accumulated member contribution balances, with interest, were used as the actuarial accrued liability.

17. Other

The contribution requirements and benefit values of a plan are calculated by applying actuarial assumptions to the benefit provisions and member information furnished, using the actuarial funding methods described in the following section.

Actual experience of SDCERS will not coincide exactly with assumed experiences, regardless of the choice of the assumptions, the skill of the actuary, or the precision of the many calculations made. Each valuation provides a complete recalculation of assumed future experience and takes into account all past differences between assumed and actual experience. The result is a continual series of adjustments to the computed contribution rate. From time to time it becomes appropriate to modify one or more of the assumptions to reflect experience trends, but not random year-to-year fluctuations.

APPENDIX B
ACTUARIAL ASSUMPTIONS AND METHODS

B. Actuarial Methods

1. Actuarial Funding Method

The Entry Age Normal actuarial funding method was used for active employees, whereby the normal cost is computed as the level annual percentage of pay required to fund the retirement benefits between each member's date of hire and assumed retirement. The actuarial liability is the difference between the present value of future benefits and the present value of future normal cost. The unfunded actuarial liability is the difference between the actuarial liability and the actuarial value of assets.

The unfunded actuarial liability is amortized by annual payments. The payments are determined so that they will be a level percentage of pay, assuming payroll increases 4.00% per year. The UAL for FY 2010 is to be amortized over several different periods. The amortization of the UAL due to assumptions changes was over 30 years, the fiscal year ending June 30, 2008 experience loss was amortized over 15 years, and the outstanding balance of the June 30, 2007 UAL was amortized over 13 years. Finally, there is an additional UAL cost component to ensure that there is no negative amortization in any year.

2. Asset Valuation Method

For the purposes of determining the Unified Port District's contribution to SDCERS, we use an actuarial value of assets. The asset adjustment method dampens the volatility in asset values that could occur because of the fluctuations in market conditions. Use of an asset smoothing method is consistent with the long-term nature of the actuarial valuation process. Assets are assumed to be used exclusively for the use of retirement benefits and expenses.

The actuarial value of assets each year is equal to 100% of the *expected actuarial value of assets*¹ plus 25% of the difference between the current market value of assets and the expected actuarial value of assets. In no event will the actuarial value of assets ever be less than 80% of the market value of assets, nor ever greater than 120% of the market value of assets.

¹ The expected actuarial value of assets is equal to the prior year's actuarial value of assets increased with actual contributions made, decreased with actual disbursements made, all items (prior assets, contributions and disbursements) further adjusted with expected investment returns for the year.

APPENDIX B
ACTUARIAL ASSUMPTIONS AND METHODS

3. Changes Since Last Valuation

As was stated in this report, there have been a few changes in actuarial methods and procedures since the June 30, 2007 actuarial valuation:

- Retirement rates were increased and the assumption was changed to be based on the amount of service as opposed to the age of a member.
- Termination rates were increased.
- Disability rates were decreased.
- Mortality rates for active UPD General members was changed from the UP1994 table set back five years to the RP2000 Combined Healthy table projected to 2008; UPD Safety members was changed from the UP1994 table (male only) set back five years to the RP2000 Combined Healthy (male only) table projected to 2008, set forward two years.
- Mortality rates for retired UPD General and Safety members was changed from the UP1994 table set back two years to the RP2000 Combined Healthy table (set forward two years for Safety only).
- The investment return assumption was lowered from 8.00% to 7.75%.
- The inflation assumption was lowered from 4.25% to 4.00%.

APPENDIX C
SUMMARY OF PLAN PROVISIONS

In 1963, the San Diego Unified Port District (UPD) contracted with the City of San Diego to have its employees participate in the City's SDCERS-administered retirement plan. In 2002, the voters of the City of San Diego voted to add section 149 to the City Charter, allowing public agencies to contract directly with SDCERS to participate in the SDCERS trust fund, and to have SDCERS administer the retirement benefits established by each contracting employer. Pursuant to Charter section 149, the Port has contracted directly with SDCERS to administer the retirement plan for its employees since January 1, 2003. The change in contracting parties brought about by this Charter amendment did not affect any rights or benefits that UPD employees earned before 2003.

1. Membership Requirement

Salaried Employees – immediate eligibility upon employment (compulsory) (§ 0101).*

2. Monthly Compensation Base for Benefits

Highest one-year average for general members hired before October 1, 2006, and all safety members. For General members hired on or after October 1, 2006, highest 3-year average (§ 0102). Subject to a 10% increase, if the General or Safety Member elects such increase in lieu of an increased benefit formula.

3. Service Requirement

Eligibility

General Members:

Age 62 with 5 years of service, or age 55 with 20 years of service (§ 0300).

Safety Members:

Age 55 with 5 years of service, or age 50 with 20 years of service (§ 0301).

Benefit

General Members:

Member choice of (1) formula in place on December 31, 2001 with 10% increase in Final Average Compensation, (2) “Andrecht” formula effective as of January 1, 2002, or (3) “2.5 % at 55” multiplier with a benefit cap of 90% of Final Average Compensation effective April 1, 2004 for Non-Executive General Members. Executive General Members receive “3% at 55” multiplier without an increase in Final Average Compensation.

* All “§ “ references are to the City of San Diego Municipal Code.

**SDCERS-UNIFIED PORT DISTRICT
JUNE 30, 2008 ACTUARIAL VALUATION**

**APPENDIX C
SUMMARY OF PLAN PROVISIONS**

Safety Members:

Member choice of formula in place on December 31, 2001 with a 10% increase in Final Average Compensation or “Andrecht” 3% formula without increases in Final Average Compensation. Effective April 1, 2004, there is a benefit cap of 90% of Final Average Compensation.

For all employees, there is an additional benefit equal to the annuitized member COLA contributions at retirement date. In all cases, there is an integration feature which provides for 2/3 of the formula multiplier on the first \$400 of Final Average Compensation.

¹Safety members have the same calculation factors through December 31, 2001

Maximum Benefit

General Members: 90% of Final Average Compensation if Post 4/1/2004 factor is chosen.

Safety Members: 90% of Final Average Compensation

Executive Members (General): None.

Unmodified Form of Payment

Monthly payments continued for the life of the member, with 50% continuance to the eligible surviving spouse, domestic partner, or dependent child under 21 years of age upon member's death.

Note: Unified Port District employees participate in Social Security.

APPENDIX C
SUMMARY OF PLAN PROVISIONS

4. Non-Industrial Disability

Eligibility

Ten years of service (§ 0503).

Benefit

General Members:

Greater of 1.5% per year of service, one-third of final compensation, or the earned service retirement benefit (§ 0505).

Safety Members:

Greater of 1.8% per year of service, one-third of final compensation, or the earned service retirement benefit (§ 0504).

5. Industrial Disability

Eligibility

No age or service requirement (§ 0500).

Benefit

General Members:

Greater of one-third of final compensation, or the earned service retirement benefit (§ 0502).

Safety Members:

Greater of one-half of final compensation, or the earned service retirement benefit (§ 0501).

6. Non-Industrial Death Before Eligible to Retire

Refund of employee contributions with interest plus one month's salary for each completed year of service to a maximum of six months salary.

7. Non-Industrial Death After Eligible to Retire for Service

50% of earned benefit payable to eligible surviving spouse, domestic partner, or child under 21 years of age.

8. Industrial Death

50% of the final average compensation preceding death, payable to eligible surviving spouse, domestic partner, or child under 21 years of age.

APPENDIX C
SUMMARY OF PLAN PROVISIONS

9. Death After Retirement

Maximum Benefit

50% of member's unmodified allowance continued to eligible surviving spouse, domestic partner, or child under 21 years of age. \$2,000 payable in lump sum to the beneficiary or the estate of the retiree.

10. Withdrawal Benefits

Pre-12/8/76 Hires

If contributions left on deposit, entitled to earned benefits, commencing anytime after eligible to retire.

Post-12/7/76 Hires

Less than five years of service (ten years of service if employee terminated before December 31, 2002) – Refund of accumulated employee contributions with interest, or may keep deposits in the System and earn additional interest and use service with a reciprocal system to establish eligibility for earned benefits upon concurrent retirement from reciprocal systems.

All Members

Five or more years of service (ten or more years of service if employee terminated before December 1, 2002); there will be a one-time Andrecht-related 7% increase in benefit.

11. Post-retirement Cost-of-Living Benefit

General and Safety Members:

Based on changes in Consumer Price Index, to a maximum of 2% per year.

12. Cola Annuity

Actuarial equivalent of accumulated contributions in cost of living annuity account at time of retirement.

SDCERS-UNIFIED PORT DISTRICT
JUNE 30, 2008 ACTUARIAL VALUATION

APPENDIX C
SUMMARY OF PLAN PROVISIONS

13. Member Contributions

Vary by age at time of entrance into SDCERS (§ 0200). While a significant portion of these contributions are “picked up”, such pick ups are not directly reflected in either the employee contributions or related refund calculations.

Table C-5				
SDCERS - Unified Port District				
Employee Contribution Rates¹				
Entry Age	General		Safety	
	Integrated Members²		Integrated Members²	
	First \$400/Mo.	Over \$400/Mo.	First \$400/Mo.	Over \$400/Mo.

57	8.87	13.31		

¹Contribution Rate = Normal Cost + Cost-of-Living Rate

²Non-Integrated members will follow the “Over \$400/month” rate

APPENDIX C
SUMMARY OF PLAN PROVISIONS

Interest:	8.00%
Salary:	5.00%
Mortality:	83 Group Annuity Mortality (GAM) male (Males set back 2 years, Females set back 8 years)

Rates include cost of providing spouse's continuance and cost of funding final one-year average in lieu of final three-year average. Changes to the salary scale and mortality table effective with the June 30, 1994 valuation were applied to the then existing member rates.

14. Internal Revenue Code Compliance

Benefits provided by the SDCERS' Trust Fund are subject to the limitations set forth in Section 415 in accordance with the "grandfather" election in Section 415(b) (10) of the Internal Revenue Code.

As of the June 30, 2006 valuation, active participants benefit payments were limited by Section 415 of the Internal Revenue Code. As of the June 30, 2007, all benefit payments were limited by Section 415 of the Internal Revenue Code.

Note: The summary of major plan provisions is designed to outline principal plan benefits. If the SDCERS staff should find the plan summary not in accordance with the actual provisions, the actuary should immediately be alerted so the proper provisions are valued.

15. Deferred Retirement Option Program

A deferred retirement option plan (DROP) was created and offered to members as an alternative method of benefit accrual. Any member who is eligible for a service retirement is eligible to participate in DROP.

A member who is participating in DROP may leave DROP at any time before the end of his or her designated DROP participation period by voluntarily leaving City employment.

DROP is not intended to jeopardize the tax-qualified status of the retirement system under the rules and regulations of the Internal Revenue Service. Benefits provided under this division are subject to the limitations of Section 415 of the Internal Revenue Code relating to the amount of benefits that can be paid.

16. Blended Benefit with Participating Agencies

Members may retire and receive benefits from multiple Plan IDs (e.g. - a Unified Port District employee could have also worked for the Airport Authority).

**APPENDIX D
GLOSSARY OF TERMS**

1. Actuarial Accrued Liability

The Actuarial Liability is the difference between the present value of all future System benefits and the actuarial value of future normal costs. This is also referred to by some actuaries as “accrued liability” or “actuarial liability”.

2. Actuarial Assumptions

Estimates of future experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and salary increases. Actuarial assumptions (rates of mortality, disability, turnover and retirement) are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (salary increases and investment income) consist of an underlying rate in an inflation-free environment plus a provision for a long-term average rate of inflation.

3. Accrued Service

Service credited under the System which was rendered before the date of the actuarial valuation.

4. Actuarial Equivalent

A single amount or series of amounts of equal actuarial value to another single amount or series of amounts, computed on the basis of appropriate actuarial assumptions.

5. Actuarial Funding Method

A mathematical budgeting procedure for allocating the dollar amount of the actuarial present value of retirement System benefits between future normal cost and actuarial accrued liability. Sometimes referred to as the “actuarial funding method”.

6. Actuarial Gain (Loss)

The difference between actual experience and actuarial assumption anticipated experience during the period between two actuarial valuation dates.

7. Actuarial Present Value

The amount of funds currently required to provide a payment or series of payments in the future. It is determined by discounting future payments at predetermined rates of interest, and by probabilities of payment.

8. Amortization

Paying off an interest-discounted amount with periodic payments of interest and principal — as opposed to paying off with lump sum payment.

**APPENDIX D
GLOSSARY OF TERMS**

9. Annual Required Contribution (ARC) under GASB 25

The Governmental Accounting Standards Board (GASB) Statement No. 25 defines the Plan Sponsor's "Annual Required Contribution" (ARC) as the employer's periodic required contributions to a defined benefit plan, calculated in accordance with the parameters outlined in Statement No. 25. The SDCERS-Unified Port District's Computed Contribution rate for FY 2010 meets the parameters of GASB 25.

10. Normal Cost.

The actuarial present value of retirement System benefits allocated to the current year by the actuarial funding method.

11. Set back/Set forward

Set back is a period of years that a standard published table (i.e. mortality) is referenced backwards in age. For instance, if the set back period is 2 years and the participant's age is currently 40, then the table value for age 38 is used from the standard published table. It is the opposite for set forward. A system would use set backs or set forwards to compensate for mortality experience in their work force.

12. Unfunded Actuarial Accrued Liability

The difference between actuarial accrued liability and valuation assets. Sometimes referred to as "unfunded actuarial liability" or "unfunded accrued liability".

Most retirement systems have unfunded actuarial accrued liability. They arise each time new benefits are added and each time an actuarial loss is realized.

The existence of unfunded actuarial accrued liability is not in itself bad, any more than a mortgage on a house is bad. Unfunded actuarial accrued liability does not represent a debt that is payable today. What is important is the ability to amortize the unfunded actuarial accrued liability and the trend in its amount (after due allowance for devaluation of the dollar).
