Exhibit A .................................................................................................................................... 14
I. INTRODUCTION

The San Diego City Employees’ Retirement System (the "Retirement System" or “SDCERS”) has determined that, over the long term, inclusion of real estate investments will enhance the risk/return characteristics of the Retirement System’s portfolio investment.

This document establishes the specific objectives, policies and procedures involved in the design, implementation, and oversight of the Retirement System’s real estate program. The objectives define the specific risk tolerance and return expectations for the program. The policies provide specifications for acceptable investment structures and management of the various risks associated with the asset class. The procedures provide guidelines for the implementation and oversight of said policies.

II. INVESTMENT OBJECTIVES

A. Asset Allocation

SDCERS has approved a long-term asset allocation target of eleven percent (11%) for investment in real estate and real estate related investments. Given the illiquid and episodic nature of funding private real estate commitments, there will be periods when this long-term target will be approached above or below but not precisely achieved.

B. Return Objectives

The Role of Real Estate (Portfolio Objectives)
Real estate is an asset class that institutional investors typically include in their investment asset mix. The Board of San Diego City Employees’ Retirement System ("Board") has determined that the objectives of the Retirement System’s Real Estate Portfolio are to generate income and provide diversification benefits to the Total Portfolio, while providing competitive returns relative to the benchmark.

Performance Measurement (Long Term Portfolio Benchmarks)
Active management, value creation strategies and the prudent use of third-party debt are approved methods for generating the expected excess return. The following benchmarks have been established for the Real Estate Portfolio:

SDCERS Total Real Estate Portfolio. On a blended basis, the net return for the SDCERS Private Portfolio is expected to meet or exceed the Private Benchmark. The Total Real Estate Portfolio Benchmark over a five-year rolling period is the net NCREIF Fund Index Open-end Diversified Core Equity Index (“NFI-ODCE”) + 50 basis points (“bps”). There are no stated return objectives for either the Core or Non-Core Portfolios. The Total Real Estate Portfolio Benchmark includes the use of public real estate securities
benchmarks to account for historical positions where SDCERS had significant exposure to publicly traded real estate securities from the first quarter of 1997 through the third quarter of 2016. The respective publicly traded real estate benchmarks are included in the Total Real Estate Portfolio benchmark and detailed below.

**Benchmark**

- **SDCERS Total Real Estate Portfolio (Net Total Return)**
  - Q4 2016 – Present: NFI-ODCE + 50 bps
  - Q3 2008 – Q3 2016: NFI-ODCE + 50 bps & EPRA/NAREIT Global Index
  - Q1 1997 – Q2 2008: NFI-ODCE + 50 bps & Wilshire REIT

**Ancillary Performance Measurement Tools**

Though there are no stated return objectives for either the Core or Non-Core Portfolio, shorter term performance and risk assessment may also be evaluated on a risk adjusted basis using the NCREIF indices in a customized index to reflect the actual composition of the portfolio.

Given the current and anticipated composition of the Real Estate Portfolio, the following methodologies can provide a more detailed and relative measurement of the risk/return profile within segments of the Portfolio. The Core Portfolio will be evaluated compared to the NFI-ODCE. The Non-Core Portfolio will be evaluated using a Private Market Equivalent (“PME”) analysis. Due to the Internal Rate of Return (“IRR”) nature of real estate performance measurement, especially within the Non-Core segment, a PME analysis examines how the addition of such investments are accretive to the Total Real Estate Portfolio when compared to the NFI-ODCE, a Time Weighted Return (“TWR”) Core real estate benchmark. The NFI-ODCE TWR measures are essentially a proxy for IRRs which will then be compared to the Non-Core IRRs which are expected to provide a premium over a long-term horizon given the additional risks undertaken by Non-Core investors compared to Core investors.

### III. INVESTMENT POLICIES

#### A. Portfolio Composition

The Retirement System divides the universe of real estate investments into two primary risk profiles: (1) Core and (2) Non-Core.
Core Characteristics

▪ Operating and substantially leased properties (75%);

▪ Modest use of asset level leverage to enhance returns (0% to 50%); on average 20-30% for the overall Core Portfolio;

▪ Property types include, but are not limited to, office, apartment, retail, industrial, hotel. These asset types comprise the bulk of the assets in the Benchmark;

▪ Total return is primarily attributable to income (40% to 65%).

The Core Portfolio primarily consists of funds that hold equity investments in real property. The Core Portfolio may also include funds that invest in debt secured by real property.

Non-Core Characteristics

▪ Non-Core investments include:

  o investment in properties requiring lease-up, rehabilitation, repositioning, expansion or those acquired through forward purchase commitments, and may also include development projects and investments in operating companies with significant underlying or affiliated real estate assets;

▪ No property types are excluded (may include office, apartment, retail, industrial, hotel or niche property types like student housing, senior housing, or public storage, data centers, life science properties, etc.);

▪ Total return is attributable to a combination of income and appreciation, often with the expectation that appreciation will comprise more than 50% of the total return.
- Investments may include both equity and debt vehicles.

- Increased levels of leverage are generally used to enhance returns (<75%), which increases the risk profile of this category.

The Retirement System has established the following composition targets for the fully funded Real Estate Portfolio. As noted above, the tactical ranges identified for each risk profile may be out of compliance as the Real Estate Portfolio rebalances or works towards the fully funded target allocations:

<table>
<thead>
<tr>
<th>SDCERS Real Estate Portfolio</th>
<th>Target Allocation</th>
<th>Tactical Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core</td>
<td>70%</td>
<td>60% to 80%</td>
</tr>
<tr>
<td>Non-Core</td>
<td>30%</td>
<td>20% to 40%</td>
</tr>
</tbody>
</table>

B. Risk Management

The primary risks associated with real estate investments are investment manager risk, property market risk, asset and portfolio management risk, leverage, climate and liquidity risks, which could result in the loss of principal.
The Retirement System will mitigate risk in a prudent manner. The following policies have been established to manage the risks involved in investing in real estate.

1. **Defined Roles for Participants**

   The real estate program shall be planned, implemented, and monitored through the coordinated efforts of the Board, Investment Committee, Staff, Real Estate Consultant (“Consultant”) and Investment Managers (“Manager” or “Managers”). The major responsibilities of each participant are outlined in Appendix A.

2. **Permissible Investments**

   The Real Estate Portfolio will consist of primarily private investments in instruments that indirectly hold real estate and real estate related assets.

   **Private Markets.** The private markets Real Estate Portfolio should consist of a majority of equity ownership of privately held institutional real estate investments. A portion of the Retirement System’s private markets real estate assets may also consist of debt investments (e.g., first mortgages, B note loans, mezzanine financing, preferred equity), not to exceed 30% of the overall real estate portfolio. Compliance with this risk parameter shall be based on a percentage of the private markets Real Estate Portfolio’s Net Asset Value at Fair Value as of each quarter end. Real Estate debt investments are to provide additional layers of diversification and offer a level of downside protection.

   **Public Markets.** Public market real estate securities may be considered from time to time for inclusion in the Total Real Estate Portfolio; but in no case to exceed 15% of the total allocation. Inclusion will generally be considered if a significant discrepancy is present between private and public market pricing. It is anticipated that Public market real estate will be used tactically; and not as a long-term structural investment unless Total Plan liquidity considerations change.

3. **Investment Structures**

   The Retirement System recognizes that, regardless of investment structure, real estate is an illiquid asset class. The Retirement System recognizes that Non-Core investments require the assumption of additional risks including diminished investor control and liquidity compared to Core funds and directly held ownership.

   The Retirement System may utilize the following investment structures:

   a) Individually Managed Accounts (“IMA”)
The use of IMA investment structures is not currently permitted, and would require an amendment to this Policy by the Board to be reinstated. The Retirement System is currently in the process of liquidating the existing DWS IMA Portfolio. Details regarding process and duties as the IMA unwinds can be found in Section IV-A: Individually Managed Accounts.

b) Commingled Funds

For the Core component, the Retirement System may consider Open-End Commingled Funds ("OECFs"). OECFs are an infinite life pool of assets, generally organized as trusts, partnerships or private REITs that are generally, but not always, diversified by geography. Individual OECFs may be diversified by property sector or invest in a single property sector.

c) Co-Investments

The Retirement System may consider Co-investments. Co-investments are typically structured as limited partnerships that invest alongside a CF. Co-investments generally have the same limited level of control as CFs, and are typically governed by partnership agreements that are based on the partnership agreement of the related CF.

For the Non-Core components, the Retirement System will generally purchase assets through the ownership of partnership units or shares of Closed-End Commingled Funds. Any legally permissible vehicle will be allowed including, but not limited to, joint ventures, limited partnerships, real estate investment trusts (private), publicly traded real estate securities, and limited liability corporations. OECFs that target Non-Core investments may also be considered.

4. Diversification

The Retirement System will seek to reduce concentration risk by diversifying its Real Estate Portfolio by manager, vintage year, property type, geography and risk profile.

It is expected that at various points in time, the Real Estate Portfolio may be more heavily exposed to a single manager, single property type or location by virtue of opportunities available in the market, which are projected to generate the returns targeted by the Retirement System. Exposure to any single manager, property type (i.e. office, retail, apartment, industrial or other) or geography should be subject to the following guidelines. Exposures outside these guidelines should be brought to the attention, and reviewed by the Investment Committee for exception qualification or risk mitigation. Consultant will provide estimates of
when the Retirement System will be in compliance with the below guidelines.

Diversification Guidelines:

Single Manager – The Retirement System should not allocate more than 30% of the Real Estate Portfolio to a single commingled fund manager. Exposure is measured by NAV plus unfunded commitments.

Property Type - The Retirement System seeks to minimize the risk of its Real Estate Portfolio by allocating its assets across the spectrum of property types. The Real Estate Portfolio shall be diversified, with the majority of investments comprised of the four traditional property types: office, industrial, retail, and multifamily (apartment). Allowable property type exposures will be within the range of +/- 15% of the NFI-ODCE weight in each property type. Property types outside of those represented in the NFI-ODCE Index are allowable up to 15% of the total fund exposure.

Geographic - The Retirement System seeks to minimize the risk of its Real Estate Portfolio by allocating its investments across the geographic spectrum.

- Within the United States, allowable geographic exposures will be within the range of +/- 15% of the NFI-ODCE weight in each geographic region.

- The development of overseas markets and investment opportunities provide investors with alternatives to further diversify their programs. However, international investments will be limited to no more than 15% of the total targeted Real Estate Portfolio and may include Core, Value Added and Opportunistic investments. International real estate investments will be held in commingled fund structures with aggregate exposure to multiple property types, regions and operators in order to reduce specific asset risk.

Commingled Funds

Diversification by vintage year, strategy and manager will be used to minimize sponsor, market, or strategy concentration. The Commingled Funds will provide reporting which will allow the Retirement System to monitor its geographic and property type diversification. Any single exposure to an Open-ended core commingled fund should be limited to 30%. The risk associated with reduced investor control and illiquidity in Non-Core strategies will be mitigated by limiting exposure to any single Non-Core
manager to 20% and any single Non-Core commingled fund to 10%.

5. **Leverage**

The use of leverage is a prudent tool for enhancing returns and diversifying equity investments, though it does raise the risk profile of investments. As such, the Retirement System has approved leverage targets and limits in order to enhance returns and manage risk levels. The availability and cost of leverage will be factors considered in determining its use. For the Total Real Estate Portfolio, the Retirement System has established a leverage maximum of fifty percent (50%), with a target range of 35-45%. Wherever possible, third party debt should be non-recourse and should not be subject to cross collateralization. At no time shall the origination of new leverage cause the Portfolio to exceed the established limits on a loan-to-value basis. In the event that any leverage constraint is breached due to a contraction in market values, the Staff and Consultant will notify the Board and make a recommendation for action or exception. This also applies to the constraints set forth below.

a) **Core**

Core assets generally provide an established stream of rental revenue. Because of the predictability of the income stream, third-party debt can be used at relatively low risk to enhance return. For the Core Real Estate Portfolio, target average leverage is 20-30%. The Retirement System has established a forty percent (45%) leverage maximum for the Core Real Estate Portfolio to allow for market dislocation periods.

b) **Non-Core**

Investments classified as Non-Core generally provide returns with a higher proportion of appreciation, as compared to income, than do Core investments. Such investments will be made through commingled funds and will therefore have specified leverage maximums stated in the offering documents. The offering documents should reflect leverage limitations of no more than 75% upon expiration of the investment period. Exposures outside these limits should be reviewed and approved by the Investment Committee for exception prior to investment.

6. **Valuations**

Investments held in Commingled Funds will generally be marked to market quarterly but in no case valued less than annually, using the valuation methodology approved with the selection of the particular investment.

7. **Monitoring of Investments**
Real estate is an illiquid asset class that requires a long-term investment horizon. The Consultant and Staff recommend that SDCERS monitor each investment relative to a manager’s performance, organizational stability, key personnel changes and other firm and fund level issues.

As outlined in Section IV.C., the Consultant prepares a Performance Measurement Report quarterly that provides detailed information concerning performance, diversification, and cash flows.

The Consultant will also provide an annual supplemental report at the end of each calendar year. The report will be a risk-based analysis providing relative and absolute assessments of the aforementioned items (e.g., performance compared to Ancillary Indices, organizational stability, key personnel changes and other firm level issues). The analysis will also review compliance with stated strategy and the impact of current market dynamics. The following categories will be used to classify SDCERS’ investments:

**Exceptional:** These investments are expected to achieve returns that exceed those originally targeted and/or expected from an investment of a similar structure and risk profile

**Satisfactory:** These investments are expected to achieve returns approximately equal to those originally targeted and/or expected from an investment of a similar structure and risk profile and have similar performance to their peer group

**Monitor:** These investments may not be expected to achieve their originally targeted returns and may risk the loss of capital. These investments may be expected to underperform their peer group. Additionally, funds may have experienced recent organizational issues

The Consultant and Staff will report to the Investment Committee and Board annually the category ranking for each investment. Investments categorized as “Monitor” will receive additional oversight and evaluation. Commingled funds typically have language allowing for the removal of the General Partner with the approval of a set percentage of Limited Partners. Commingled fund interests may be sold on the secondary market, typically at a discount to current value, which should only be done when proceeds from a sale can be reinvested more effectively, or the outlook for a fund or manager is significantly negative.
C. Discretionary Authority

The Board controls the delegation of discretion. The Policies and Procedures described herein are structured to control investment risk as well as to enhance the Retirement System’s ability to execute transactions.

1. Commingled Funds (“CF”) 

CFs, which includes both open and closed-end vehicles, are structured to give the highest level of discretion to the Manager. The limited investor control of management decisions inherent in CF investments is appropriate given the flexibility required to achieve higher expected returns. Nonetheless, preference will be given to those CF vehicles extending greater investor transparency and control. Investments made in CFs are monitored for compliance with vehicle documents through quarterly performance measurement procedures and through documentation provided with capital calls and income distributions.

2. Co-Investments 

Co-investments are typically structured as limited partnerships that invest alongside a CF. Co-investments generally have the same limited level of control as CFs, but offer investors a more favorable fee and carried interest structure than through the main CF. Individual co-investments are monitored in the same manner as CFs, with respect to the Retirement System’s Real Estate Portfolio and individual investment guidelines.

IV. INVESTMENT PROCEDURES

The Annual Investment Plan (“AIP”) identifies the investment needs of the Portfolio and establishes the parameters for the selection of appropriate investments. The AIP will be presented to the Investment Committee/Board annually for approval. The particular needs for each AIP will be established in light of the structure, objectives and performance of the existing Portfolio as well as current market opportunities. All AIPs will be consistent with the policies detailed in Section III.A-C.

A. Individually Managed Accounts (“IMA”) 

The existing IMA is in the process of liquidation. The IMA Manager in its role as a fiduciary will continue to retain control over investment sales timelines and recommendations. The IMA Manager will continue to provide the Retirement System with all necessary and required reporting materials and annual asset management plans related to the Retirement System’s investments until such time as the account is fully liquidated and closed.
B. Commingled Funds

The following procedures will be utilized in the selection, closing and monitoring of specific Commingled Fund (CF) investments.

1. **CF Selection Process**
   
a) The Consultant will maintain an ongoing review of offerings within the institutional marketplace and, based on due diligence findings, refer appropriate CF investments to Staff.

b) Staff shall review the Consultant recommendations for compliance with agreed upon due diligence procedures for each fund recommendation.

c) Staff shall verify the compliance of each recommended fund with the approved Real Estate Investment Policy and Annual Investment Plans.

d) Staff, with Consultant assistance, shall select appropriate CF investments in line with SDCERS Real Estate Investment Policy and Annual Investment Plan for presentation to the Investment Committee/Board.

2. **CF Control and Monitoring**

CF investments will be monitored quarterly by Staff, with Consultant’s assistance, to evaluate investment performance and to ensure compliance with vehicle documents.

C. Co-investments

The following procedures will be utilized in the selection, closing and monitoring of specific co-investments.

3. **Co-investment Selection Process**
   
a) Manager will notify the Consultant and/or Staff of any available co-investment opportunity. Staff and the Consultant will confirm receipt of the notification with one another.
b) Staff shall verify the compliance of the co-investment opportunity with the approved Real Estate Investment Policy and Annual Investment Plans.

c) Staff, with Consultant assistance, shall evaluate the prospective co-investment.

d) Upon a favorable evaluation, Staff, with Consultant assistance, shall present to the Investment Committee/Board or, if the investment meets the criteria set forth below, Staff is granted discretion to proceed with the investment process.

- No more than 2% of the Total Real Estate Portfolio;
- Sponsored by an existing SDCERS real estate fund manager;
- No ground-up development;
- Reasonableness opinion from the Consultant

e) Staff and Consultant will report to the Investment Committee/Board at the next Investment Committee/Board meeting to disclose any co-investment that was made with staff discretion. Staff and Consultant shall report pertinent information regarding the co-investment.

4. Co-investment Control and Monitoring

Co-investments will be monitored quarterly by Staff, with Consultant’s assistance, to evaluate investment performance and to ensure compliance with vehicle documents.

D. Performance Measurement Report

On a quarterly basis, the Consultant will prepare a comprehensive reporting and evaluation system addressing each investment and Manager. The evaluation system shall provide such information as may be required by the Retirement System to understand and administer its investments and Managers.

The content of the report shall include attributes for the investment managers and the Total Portfolio including, but not limited to: income, appreciation, gross and net returns, cash-flow, internal rate of return, diversification, comparisons to relevant industry performance indices and information reporting standards, and Real Estate Investment Policy and Annual Investment Plan compliance. Each investment will be reviewed for significant events and projected performance and an opinion provided with respect to Manager performance. Budget and Management Plan variances, as reported by IMA Managers, will also be provided upon request.
The Consultant shall prepare and forward to the Retirement System a Performance Measurement Report within ninety (90) days following the last day of each quarter, except for year-end reporting which will be prepared and forwarded to the Retirement System within 180 days. The Year-End Report will also include an annual risk-based analysis that will allow the Consultant and Staff to rank investments according to the Consultant’s category ranking system (as described above in section B.7).
Exhibit A

Defined Roles for Participants

Duties of the SDCERS Board

- Establishes the role of the real estate investment program in light of the Total Portfolio objectives.
- Approves the allocation to real estate and approves any adjustments to the allocation which may be necessary from time to time.
- Approves the Real Estate Investment Policy and the Annual Investment Plan for the real estate program.
- Controls the delegation of discretion regarding matters of investment selection, manager retention, manager termination, and management of investments.
- Reviews the Real Estate Portfolio on a quarterly basis to evaluate the investment performance and to ensure compliance with policy guidelines and approved Investment Plans.

Duties of the Investment Committee or the Full Board in the absence of an Investment Committee

- Reviews the Real Estate Investment Policy and the Annual Investment Plan for the real estate program. Presents and recommends the Plans to the Board for approval.
- Reviews the Staff’s selection of Managers, Investment Partners or Ventures, and Commingled Fund Sponsors and reports selections to the Board.
- Reviews Staff and Consultant recommendations for removal of Managers and make recommendations to the Board.
- Reviews the Real Estate Portfolio on a quarterly basis to evaluate the investment performance and to ensure compliance with policy guidelines and approved Annual Investment Plans, and reports to the Board.

Duties of the SDCERS Staff

- Reports to the Investment Committee and Board on matters of policy.
- Staff, with Consultant assistance, is responsible for the recommendation for selection, retention, and termination of managers and real estate investments that are in line with the Real Estate Investment Policy, Annual Investment Plan, and/or Board approved tactical plans that may arise from time to time.
SAN DIEGO CITY EMPLOYEES’ RETIREMENT SYSTEM  
REAL ESTATE INVESTMENT POLICY

- Participates with the Consultant in the Annual Real Estate Portfolio Review, including Budget and Management Plans and Manager Investment Plans. Reports completion to the Investment Committee.
- Brings any non-conforming items or significant issues to the attention of the Investment Committee.
- Documents and monitors funding procedures.
- Completes any other activity as directed by the Committee and/or Board.

SDCERS Staff - Individually Managed Account (“IMA”) Duties (For Liquidation of IMA Account):
- Oversees preparation of annual Manager Investment Plans and reports completion to the Investment Committee.
- Reviews the Budget and Management Plans prepared by IMA Managers and reports completion to the Investment Committee.
- Reviews fees for compliance and insures that Incentive Fees are processed appropriately.
- Performs other duties required to execute the IMA Investment Procedures.
- Monitors the closing process, and with legal counsel, reviews and executes any required documentation for re-financings and other capital transactions between IMA Managers and the Retirement System.

SDCERS Staff- Commingled Fund (“CF”) Duties
- With the assistance of the Consultant, conducts screening, review, and selection of CF offerings.
- Oversees the commitment process, and with legal counsel, reviews and executes any required documentation.

SDCERS Staff- Co-investment Duties
- With the assistance of the Consultant, conducts screening, review, and selection of Co-investment offerings.
- Oversees the commitment process, and with legal counsel, reviews and executes any required documentation.

Duties of the Consultant
- Reports directly to the Board, Investment Committee and Staff on matters of policy.
- Brings any non-conforming items or significant issues to the attention of the Staff and/or Board.
- Monitors the performance of the Real Estate Portfolio and compliance with approved policy.
- Prepares/Reviews the Real Estate Investment Policy and Annual Investment Plan and, in conjunction with Staff, presents the Plans to the Investment Committee for review.
SAN DIEGO CITY EMPLOYEES’ RETIREMENT SYSTEM
REAL ESTATE INVESTMENT POLICY

- Prepares a quarterly Performance Measurement Report (PMR) to evaluate investment performance and to ensure compliance with policy guidelines and approved Investment Plans. Presents Portfolio PMR to the Investment Committee quarterly.

- Assists Staff in the Annual Real Estate Portfolio Review

- Provides Staff and/or Board with topical research and education on investment subjects that are relevant to SDCERS.

- Screen database to identify Manager candidates that exhibit qualities consistent with the qualification criteria and work jointly with Staff to determine portfolio fit.

- Accept and evaluate recommendations made by Staff for portfolio consideration.

**Consultant - Individually Managed Account (“IMA”) Duties**

- Assists Staff in overseeing the liquidation of the existing IMA.

- Oversees Manager preparation of annual Manager Investment Plans and, in conjunction with Staff, and reports completion to the Investment Committee.

- Reviews the Budget and Management Plans prepared by IMA Managers and, in conjunction with Staff, reports completion to the Investment Committee.

- Performs other duties required to execute the liquidation of the IMA.

**Consultant - Commingled Fund Duties**

- Conducts, or assists Staff in conducting analysis of Commingled Fund offerings in accordance with the Commingled Fund selection process.

- Provides written analysis of Commingled Funds as requested by Staff.

**Consultant - Co-Investment Duties**

- Conducts, or assists Staff in conducting analysis of Co-investment offerings in accordance with the Co-investment selection process.

- Provides written reasonableness opinion of Co-investment opportunities as requested by Staff.

**Duties of the Manager**

- Provides performance measurement data in form and substance as requested by the Retirement System.

**Individually Managed Account Managers:**

- Disposes of assets on behalf of the Retirement System.

- Adheres to the most recent version of the Reporting Standards established jointly by the National Council of Real Estate Investment Fiduciaries (“NCREIF”) and the Pension Real Estate Association (“PREA”) (“Reporting Standards”).
SAN DIEGO CITY EMPLOYEES’ RETIREMENT SYSTEM
REAL ESTATE INVESTMENT POLICY

- Prepares Budget and Management Plans to be submitted to the Staff and Consultant.
- Meets with Staff and Consultant for the Annual Real Estate Portfolio Review.
- Provides Consultant, when requested, Annual Review information.
- Assists the Staff in preparing funding or disposition procedures.

**Commingled Fund and Co-investment Managers:**
- Adheres to reporting standards established by the CFA Institute and ILPA and complies with generally accepted accounting principles (“GAAP”).
- Executes and performs its duties under the terms of the investment vehicle documents.
- Provides timely requests for capital contributions.
- Provides quarterly financial statements and annual reports.
- Conducts no less frequently than annually meetings with Staff and Consultant to discuss important developments regarding portfolio, investment and management issues.

**Duties of Legal Counsel**
- Outside legal counsel, selected by the Retirement System as a representative for the Plan, will review upon request, all real estate related documents and/or provide advice for special investment situations as needed.
